1. The applicant is hereby notified that International Preliminary Examining Authority transmits here with the international preliminary examination report and its annexes, if any, established on the international application.
2. A copy of the report and its annexes, if any, is being transmitted to the International Bureau for communication to all the elected Offices.
3. Where required by any of the elected Offices, the International Bureau will prepare an English translation of the report (but not of any annexes) and will transmit such translation to those Offices.
4. REMINDER

The applicant must enter the national phase before each elected office by performing certain acts (filing translations and paying national fees) within 30 months from the priority date (or later in some Offices) (Article 39(1)) (see also the reminder sent by the International Bureau with Form PCT/IB/301).

Where a translation of the international application must be furnished to an elected Office, that translation must contain a translation of any annexes to the international preliminary examination report. It is the applicant's responsibility to prepare and furnish such translation directly to each elected Office concerned.

For further details in the applicable time limits and requirements of the elected Offices, see Volume II of the PCT Applicant's Guide.

V. Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

1. Statement

Novelty (N)	Claims	1 - 12	YES
	Claims	None	NO
Inventive step (IS)	Claims	1 - 12	YES
	Claims	None	NO
Industrial applicability (IA)	Claims	1 - 12	YES
	Claims	None	NO

2. Citations and explanations (Rule 70.7)

Reference is made to the following documents:

D1 = US2001/0037386 A1 (Susumu Takatsuka et al.) 01 Nov. 2001

D2 = US2001/0043738 A1 (Harpreet Singh Sawhney et al.) 22 Nov. 2001

The subject-matter of claims 1-12 is about a method of generating and consuming 3D audio scene with extended spatiality of a sound source which describes the shape and size attributes of the sound source. The method includes the steps of: generating audio object, and generating 3D audio scene description information including attributes of the sound source of the audio object.

D1 discloses a communication system, an entertainment apparatus, a recording medium, and a program which indicate a connection to a server with an image symbolizing access, rather than a message, thereby allowing the user to find it fun to exchange information using a network. D2 discloses a video flashlight method which creates virtual images of a scene using a dynamically updated three-dimensional model of the scene and at least one video sequence of images.

None of D1 and D2 discloses the technical features of the present invention.

Therefore, the subject-matter of claims 1-12 is considered to be novel and involve an inventive step.
